EDUCATION

- **University of Guelph** Guelph, ON, Canada
Honours Bachelor of Computing — Software Engineering *Sep 2025 – Apr 2029 (Expected)*
- **Monsignor Percy Johnson Catholic Secondary School** Etobicoke, ON, Canada
Ontario Secondary School Diploma (OSSD) *Sep 2021 – June 2025*

TECHNICAL SKILLS

- **Programming Languages:** Python, C, C++, Java, JavaScript, HTML, CSS, TypeScript, SQL, Bash/Shell Scripting, MATLAB
- **Frameworks & Libraries:** React, Node.js, Next.js, FastAPI, OpenCV, MediaPipe, PyAutoGUI, Pandas, PyTorch, Tailwind CSS, Framer Motion
- **Developer Tools & Design:** Git, GitHub, Linux, VS Code, Vercel, LaTeX, Docker, npm/pip, Figma, Supabase, Pinecone; Adobe Premiere Pro, Photoshop, Unity, Blender 3D, DaVinci Resolve, Canva

PROJECTS

- **Verivance — Explainable RAG Search Engine:** Built an explainable RAG search engine that grounds AI answers in traceable evidence instead of unverified model output. Ingests documents/web content, chunks and embeds text, stores vectors in Pinecone for semantic search, then ranks and passes top matches to the Gemini API as grounding context, displaying answers alongside their sources. Stack: Next.js, React, TypeScript, Tailwind CSS, Framer Motion, Python, FastAPI, Gemini API, Pinecone, PostgreSQL/Supabase, Docker, Git/GitHub, Vercel.
- **RankedIn — LinkedIn Aura Score & Leaderboard — GDGHacks 2nd Place:** Built a web app that scrapes LinkedIn profiles and scores them with a fully custom, deterministic scoring engine to generate an explainable Aura Score from 0-2,500 across 8 dimensions, displayed on a live public leaderboard, using a 3-tier scraping fallback chain built entirely without AI APIs. Stack: Next.js 15 (App Router), TypeScript, Tailwind CSS v4, Framer Motion, Supabase (Postgres + Auth), RapidAPI.
- **Panic Pick — Pixel-Art Web Game:** Designed and developed a pixel-art style web game using HTML, CSS, and vanilla JavaScript, with animated day/night themes, custom UI transitions, and responsive interactive menus built without external frameworks.
- **Visual Mouse — Computer Vision Hand Gesture Controller:** Built a real-time hand-gesture-controlled mouse using webcam input, computer vision, and MediaPipe for hand landmark detection, with PyAutoGUI driving OS-level cursor control.
- **Battleship — Java Game with AI Opponent:** Built a Java-based Battleship game pitting a player against an AI opponent on customizable grids, applying object-oriented design to separate board management, ship placement, and turn-based gameplay logic, with AI moves driven by probability-based hunt-and-target strategies.

AWARDS & ACHIEVEMENTS

- **GDGHacks — 2nd Place, Best Cutting Edge UI:** Awarded 2nd place in the Best Cutting Edge UI category at GDGHacks, a competitive hackathon recognizing outstanding and innovative user interface design.

VOLUNTEER EXPERIENCE

- **Electrical Shop** Toronto, ON, Canada
Shop Assistant — Volunteer *May 2021 – Dec 2022*
 - **Customer, Technical & Inventory Support:** Assisted customers with product selection, supported electricians with tool setup, and maintained a clean, organized shop environment.
- **St. Behnam Syriac Orthodox Church** Toronto, ON, Canada
Tax Clinic Volunteer *May 2021 – July 2021*
 - **Tax Clinic Support:** Guided clients through tax procedures, scheduled appointments, and supported document organization.
