EDUCATION

- **University of Guelph** Guelph, ON, Canada
Honours Bachelor of Computing, Software Engineering Sep 2025 - Apr 2029 (Expected)
- **Monsignor Percy Johnson Catholic Secondary School** Etobicoke, ON, Canada
Ontario Secondary School Diploma (OSSD) Sep 2021 - Jun 2025

TECHNICAL SKILLS

- **Languages:** Python, C, Java, JavaScript, TypeScript, HTML, CSS, SQL, Bash
- **Frameworks/Libraries:** React, Next.js, FastAPI, Node.js, Tailwind CSS, OpenCV, MediaPipe, PyTorch, Pandas
- **Tools/Platforms:** Git, GitHub, Linux, Vercel, Supabase, Pinecone, OpenSSL
- **AI/Data:** RAG, Vector Search, Semantic Search, Embeddings, Gemini API

PROJECTS

- **Verivance - Explainable RAG Search Engine | Aug 2026 | [GitHub](#) [Live](#)**
 - Made AI answers easier to verify by retrieving evidence before generation and showing the ranked sources behind each response. Indexed and embedded 281 document chunks in Pinecone, retrieving the top 5 semantic matches for each query.
 - Built the FastAPI backend and Next.js/React/TypeScript interface, connecting query embeddings, Pinecone semantic search, similarity ranking, and Gemini generation into one retrieval pipeline. Added source citations, similarity scores, web retrieval, and deployed the frontend on Vercel.
- **RankedIn - LinkedIn Aura Score & Leaderboard - GDGHacks 2nd Place | May 2026 - Jun 2026 | [GitHub](#) [Live](#)**
 - Turned LinkedIn profile data into an explainable 0-2,500 Aura Score across 8 weighted dimensions and a live public leaderboard, giving users a clear breakdown of profile strengths and weaknesses. RankedIn won 2nd Place for Best Cutting Edge UI at GDGHacks.
 - Built a custom deterministic scoring engine and 3-tier scraping fallback using a fresh scraper, enrichment API, and raw HTML parsing to keep profile data available despite anti-scraping measures. Implemented the leaderboard and data flow with Next.js 15, TypeScript, Supabase, Tailwind CSS v4, Framer Motion, and RapidAPI.
- **Lattix - Post-Quantum Cryptography Migration Lab | Aug 2026 - Present | [GitHub](#)**
 - Building an interactive lab that lets users run and compare real classical and post-quantum cryptographic operations, making migration differences visible through hands-on tests. The C/OpenSSL 3.5+ backend supports ML-KEM-768, ML-DSA-65, and AES-256-GCM.
 - Implemented C wrappers for key generation, encapsulation and decapsulation, signing and verification, and authenticated encryption, then exposed those operations through a Node.js/TypeScript API for the interactive frontend.
- **Visual Mouse - Computer Vision Hand Gesture Controller | Feb 2026 - Mar 2026 | [GitHub](#)**
 - Enabled hands-free cursor movement and clicking from webcam input using MediaPipe hand-landmark detection and OpenCV frame processing, translating recognized gestures into OS-level mouse actions through PyAutoGUI.
 - Designed click and move logic from relative finger distances between hand landmarks, separating gesture recognition from cursor-control actions to keep the interaction responsive and easier to tune.
- **Panic Pick - Pixel-Art Web Game | Apr 2026 - Jun 2026 | [GitHub](#) [Live](#)**
 - Built a responsive pixel-art browser game in vanilla JavaScript, HTML, and CSS with animated day/night themes, custom UI transitions, crisp pixel rendering, and interactive menus without external frameworks.
 - Structured the game UI and interaction logic into reusable JavaScript components, keeping menus, theme changes, and animations modular so new gameplay features could be added without an external framework.

AWARDS & ACHIEVEMENTS

- GDGHacks - 2nd Place, Best Cutting Edge UI: RankedIn was recognized for interface design and technical execution.

VOLUNTEER EXPERIENCE

- **Electrical Shop** Toronto, ON, Canada
Shop Assistant, Volunteer May 2021 - Dec 2022
 - Assisted customers with electrical product selection and supported electricians with tool setup and equipment handling.
 - Organized inventory and maintained a clean, efficient workspace to support daily shop operations.
- **St. Behnam Syriac Orthodox Church** Toronto, ON, Canada
Tax Clinic Volunteer May 2021 - Jul 2021
 - Guided clients through tax procedures, scheduled appointments, and supported staff with document organization.
